

Introducing a New Comprehensive BIRNS Millennium Interconnect Brochure

New BIRNS
Millennium
Interconnect Brochure

BIRNS, Inc. has launched a major new resource for the subsea industry with its new BIRNS Millennium Interconnect Brochure. This detailed overview of our popular 6km rated [BIRNS Millennium™](#) connector series and a wide range of relevant connectivity capabilities and options is expanded from its former revision of 18 pages to the new iteration of 49 pages. It includes interactive features like product selection and detailed part numbering guides, as well as configuration and specification tools to walk the user through the selection and ordering process for the series' electrical, optical, coax and hybrid interconnect solutions.

The brochure also features important information for our customers, like rigorous qualification testing capabilities and outlines a wide array of interconnect offerings in the series. It includes [Ethernet assemblies](#) with data transfer rates of 9.4+/- 0.1 Gigabits per second and [open face rated coax options](#) with insertion losses of ≤ 0.7 dB and maximum VSWR of 1.7:1, along with detailed custom cable stock configurations and drawings to make the decision-making process more seamless.
